

Dear Dr. Prezeau,

We have examined this manuscript. Judging by its results, context, and scope, we conclude that it is not suited for Physical Review C.

To be publishable in Physical Review C, manuscripts must contain significant new nuclear physics, be of high quality and scientific interest, and be recognized as an important contribution to the literature.

Although we make no judgment regarding the correctness of the work, the scientific approach and context as currently presented do not give one confidence that the manuscript meets these criteria.

We are therefore not sending your manuscript out for review.

Yours sincerely,

Joseph I. Kapusta

Chief Editor

Physical Review C
